Question

If b equals 18, what is the value of a ?

█: masked salient prefix

█: current prediction

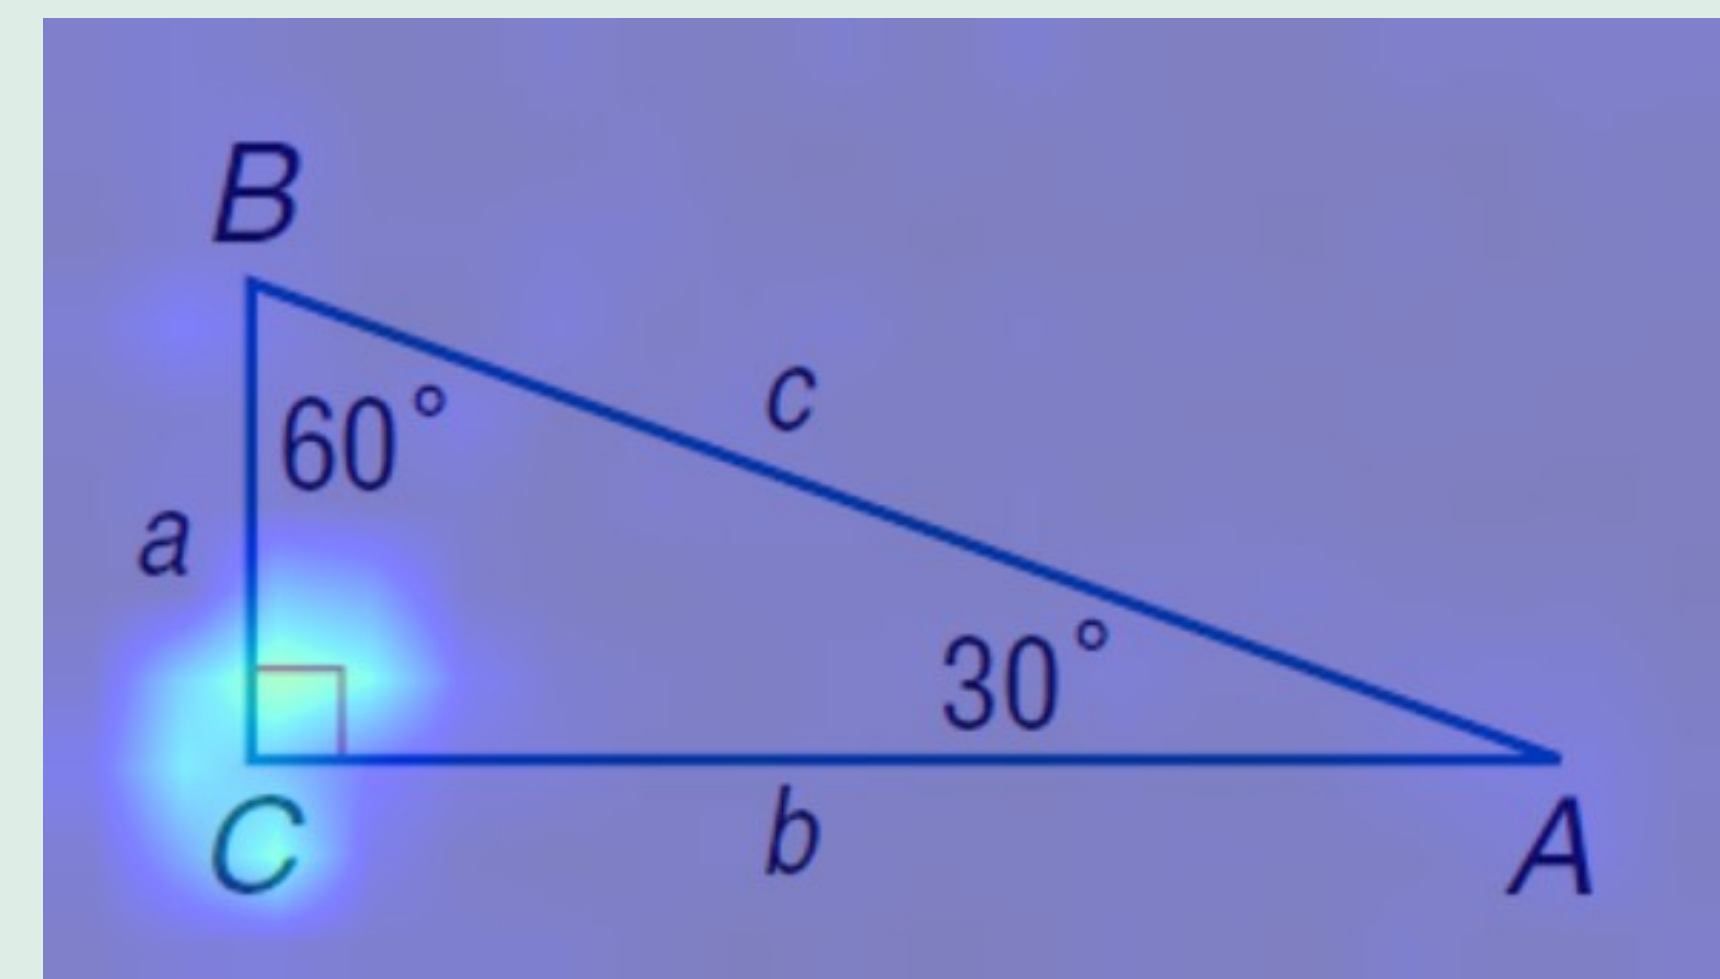

Teacher-generated response

⋮
The triangle has vertices B,C,A. Right angle at C. So angle at C is 90° , angle at B is 60° , angle at A is 30° .

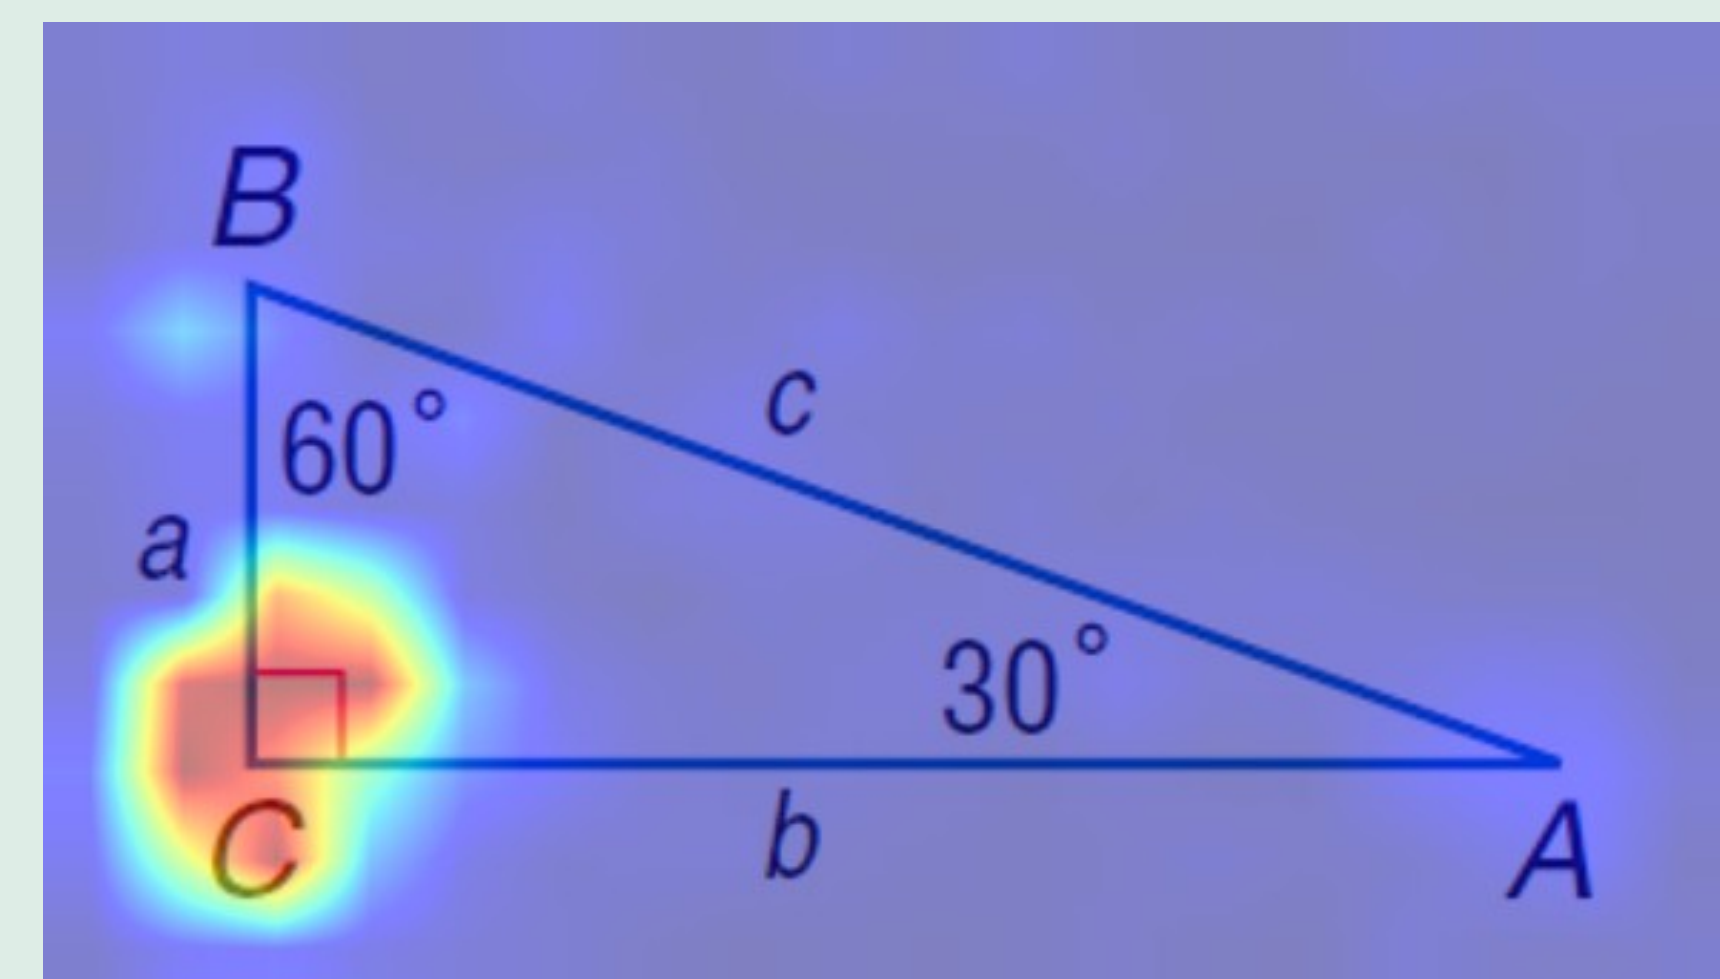

⋮
In the image, side a is $6\sqrt{3}$ by utilizing the side length ratios inherent to a right triangle with 90°
